Subject: Phase I Environmental Site Assessment
Bank of America
5742 West Belmont Avenue
Chicago, Illinois 60634
Mail Code: IL4-311

Dear Mr. Fowler:

Attached is the Phase I Environmental Site Assessment report completed for the property located at 5742 West Belmont Avenue, Chicago, Cook County, Illinois. The conclusions presented in this report are based on the results of a reconnaissance-level site visit conducted by LFR Inc. (LFR) personnel, review of available and pertinent background information and a regulatory file search.

LFR appreciates this opportunity to provide consulting services to you. If you have any questions concerning this project, or would like to discuss other environmental concerns, please contact me at (781) 356-7300.

Sincerely,

A handwritten signature in black ink, appearing to read "Stephen P. McCarthy". The signature is stylized with a large, looping initial "S" and a clear "P" and "M".

The environmental assessment described herein was conducted by the undersigned of LFR Inc. (LFR). LFR's investigation consisted solely of the activities described in the Introduction of this report, in accordance with the Bank of America Phase I Environmental Site Assessment Standard Scope of Work and Report Outline, and is subject to the Limitations and Service Constraints provided in Section 6.0 and the Terms and Conditions of the Standard Consulting Services Agreement signed prior to initiation of the assessment.

EXECUTIVE SUMMARY OF FINDINGS

LFR Inc. (LFR) was retained by Bank of America to conduct a Phase I Environmental Site Assessment of the property located at 5742 West Belmont Avenue in the City of Chicago, Cook County, Illinois (the Site). The Site consists of an approximately 0.15-acre parcel of land improved with a one-story, 5,500-square foot bank branch building that was constructed in 1964. The interior of the building is comprised of a lobby/teller area, offices, a break room and bathrooms. The entire Site area is occupied by the Site building. The Site is abutted to the north by an alley and to the south by a concrete sidewalk.

The Site was undeveloped in 1924 and abutted by residences. The Site has been developed with a commercial building since at least 1949. Previous occupants included Robertson & Company Paints which occupied the Site from at least 1949 to 1957. The Site was occupied by a sporting goods store and camera shop from approximately 1966 until approximately 1976 and a bank from approximately 1978 until present. The current Site building was constructed in 1964.

LFR reviewed a Limited Asbestos Survey Report completed by LFR dated March 15, 2008 that summarized the collection of suspect asbestos-containing material (ACM) taken prior to new equipment installation within the banking center. A total of 48 samples were collected including ceiling tile, gypsum board, joint compound, wallpaper glue, cove base and mastic, carpet mastic, 12" x 12" beige and brown ceramic floor tile, 12" x 12" beige floor tile and mastic, 18" x 18" beige and tan floor tile and mastic, 2" x 2" beige ceramic floor tile, plaster, brick mortar, silver and black vapor barrier, and HVAC duct insulation. The 12" x 12" beige floor tile and mastic in the east storage room and server room were found to contain 1-5% Chrysotile asbestos. All materials were observed to be in good condition except for the white coat and brown coat ceiling plaster located in the front hall of building. The ceiling plaster was observed to be damaged. None of the other materials sampled and analyzed contained asbestos.

On July 20, 2009, Mr. Stuart Engelke of LFR visited the Site to evaluate the possible presence of petroleum products or hazardous materials/wastes at the Site. LFR's investigation included a reconnaissance of the Site and adjacent properties, background research, and review of available local, state and federal regulatory records regarding the presence of petroleum products or hazardous materials/wastes at or in the vicinity of the Site.

Based on the work completed, the following recognized environmental condition (REC) was identified:

- Historical information available for the Site identified building permits for the installation of one 1,000-gallon fuel oil underground storage tank (UST) and one 500-gallon naphtha UST in February and April 1949. The permits were issued to Robertson & Company which, according to city directories and a 1949 Sanborn Fire Insurance map, formerly occupied the Site. The location of the USTs are not shown on the 1949 Sanborn map and no information regarding the removal of these USTs was found in state or local agency files or in the EDR database report. The Site address has not changed according to the historical information reviewed.

Conclusion

LFR has performed a Phase I Environmental Site Assessment (ESA) in general conformance with the scope and limitations of ASTM Practice E 1527 of 5742 West Belmont Avenue in Chicago, Cook County, Illinois. Any exceptions to, or deletions from, this practice are described in Section 5.3 of this report. This assessment has revealed no evidence of RECs in connection with the Site with the exception of the two USTs permitted for the Site in 1949. Because there is no removal documentation, it is possible that the USTs may exist at the Site; however, the tanks may be located beneath the current Site building.

1.0 INTRODUCTION

LFR Inc. (LFR) performed a Phase I Environmental Site Assessment (ESA) of the property located at 5742 West Belmont Avenue in Chicago, Cook County, Illinois (“the Site”). The Site consists of a one-story, 5,500-square foot bank branch building located on an approximately 0.15-acre parcel of land. This ESA document has been prepared and issued in a format as prescribed by and in accordance with Bank of America requirements.

The Site location is identified on a portion of an annotated topographic map included as Figure 1. The Site layout is detailed on Figure 2. Site photographs are included as Appendix A.

1.1 Purpose

The Phase I ESA has been requested by Bank of America (Client). The purpose of this Phase I ESA is to provide appropriate inquiry into the previous ownership and use of the Site consistent with good commercial and customary practice in an effort to minimize liability. LFR assumes that the information provided by the Client, the site contact, the regulatory database provider, and local government agency is true and reliable.

The objective of the ESA was to identify recognized environmental conditions (RECs) in connection with the property, to the extent feasible pursuant to the processes prescribed in ASTM International E-1527-05 guidelines. The term “REC,” as defined by ASTM, is “the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or the material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property.” The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include *de minimis* conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

1.2 Involved Parties

This Phase I ESA was conducted for the use and reliance by Bank of America and its successors and assignees, and may be relied upon by such parties. No use of the information contained in this report by others is permissible without receiving prior written authorization to do so from LFR. LFR is not responsible for independent conclusions, opinions, or recommendations made by others or otherwise based on the findings presented in this report.

1.3 Scope of Work

To complete this assessment, LFR's scope of services included the following:

- review of Federal and State regulatory agency databases identified by ASTM for the Site and a selected radius around the Site;
- contact with local environmental regulatory agencies to inquire about environmental conditions at the Site and its vicinity;
- review of the Site history through available ASTM Standard Historical Sources;
- a reconnaissance of the Site to make surficial observations for evidence of recognized environmental conditions;
- a review of adjoining properties to identify the potential use of hazardous materials;
- interviews with people knowledgeable about the Site regarding current and past site usage and facility operations; and,
- preparation of this report.

2.0 GENERAL SITE CHARACTERISTICS

2.1 Site Ownership and Location

The Site is located at 5742 West Belmont Avenue, City of Chicago, Cook County, Illinois. According to the Cook County Assessor's Office, the Site is identified as Parcel Identification number 13-20-432-041-0000 and is owned by Bank of America. Access to the Site is from the east and west via Belmont Avenue.

2.2 Adjacent Properties

The Site and surrounding properties are located in a commercial and residential area of Chicago, Illinois.

The use of the adjacent properties at the time of LFR's investigation is summarized as follows:

- North: Asphalt alley, beyond which are single-family residences.
- South: Belmont Avenue, beyond which is a strip-mall and parking lot.
- East: Family Dentist, dental office.
- West: El Gordo, Mexican restaurant and tavern.

2.3 Site Description and Current Site Uses/Operations

The Site consists of an approximately 0.15-acre parcel of land improved with a one-story, 5,500-square foot bank branch building that was constructed in 1964. The Site building appears to cover the entire area of the Site. The Site building is of concrete block construction with a brick exterior façade, slab-on-grade concrete foundation, and flat roof. The interior of the building is comprised of a lobby/teller area, offices, a break room and bathrooms.

The remainder of the Site is improved with an asphalt-paved rear alley, and concrete walkways in the front of the Site building. Drive-thru teller lanes are not located at the Site building.

The building is heated and cooled by electricity provided by Commonwealth Edison and connected to the municipal water and sewer systems provided by the City of Chicago.

2.4 Former Site Uses/Operations

The Site was undeveloped in 1924 and was abutted by residences. The Site has been developed with a commercial building since at least 1949. Previous occupants included Robertson & Company Paints which occupied the Site from at least 1949 to 1957. The Site was occupied by a sporting goods store and camera shop from approximately 1966 until approximately 1976 and a bank from approximately 1999 until the present. The current Site building was constructed in 1964.

3.0 ENVIRONMENTAL SETTING

3.1 Regional Physiographic Conditions

The United States Geological Survey (USGS) 7.5 Minute Topographic Map of the River Forest, Illinois Quadrangle depicts the Site elevation as approximately 620 feet above mean sea level. The Site is relatively flat; however, area topography slopes to the east towards the Chicago River and Lake Michigan.

3.2 Soil Conditions

According to the Natural Resources Conservation Service (NRCS) Soil Survey data, the soils beneath the Site consist of Urban Soils. These soils have been highly disturbed by manmade development and lack characteristics of the original soil.

3.3 Geologic Conditions

Cook County bedrock is overlain by up to 300 feet of unconsolidated glacial deposits. Below the glacial deposits is Silurian dolomite bedrock, ranging in thickness from less than one foot to more than 300 feet on the far eastern side along Lake Michigan.

Depth to bedrock at the Site is unknown and no outcrops were observed on the Site.

3.4 Surface Water and Groundwater Characteristics

There are no surface water bodies on or adjacent to the Site. The nearest surface water body is the Chicago River, which is located approximately 4 miles east of the Site, and Lake Michigan, which is located approximately 6 miles east of the Site.

Based on topography and nearby surface water features, groundwater is inferred to flow to the east. Pending site-specific hydrogeologic data to the contrary, groundwater at the Site is anticipated to be Class I Potable Resource Groundwater as listed in 35 Illinois Administrative Code Part 640 *Groundwater Quality*.

4.0 RESULTS OF INVESTIGATION

Mr. Stuart Engleke of LFR conducted a Site inspection on July 20, 2009. The weather at the time of the investigation was sunny and clear, with a temperature of approximately 80 degrees Fahrenheit. LFR was provided access to accessible interior and exterior areas of the Site, with the exception of the roof.

4.1 Site Inspection Observations

Underground Storage Tanks (USTs) and Aboveground Storage Tanks (ASTs)

LFR did not observe evidence of USTs (fill pipes, vent pipes, etc.) or ASTs at the Site.

Hazardous substances and petroleum products

LFR did not observe the use or storage of hazardous substances or petroleum products at the Site.

Unlabeled Drums/Containers

LFR did not observe unlabeled drums or containers at the Site.

Staining/Corrosion

LFR did not observe stained or corroded surfaces at the Site.

Stressed Vegetation

LFR did not observe evidence of stressed vegetation at the Site.

Electrical Transformers/Equipment

LFR observed three pole-mounted transformers along the alley abutting the Site to the north. The transformers, which are owned by Commonwealth Edison, were not labeled as being classified as “Non-PCB.” LFR did not observe evidence of leaks or staining on or beneath the transformers.

LFR did not observe other electrical transformers or hydraulic equipment at the Site.

Drywells, Sumps, Catch Basins and Floor Drains

Floor drains were located in the storage room and utility closet at the site. LFR did not observe other drywells, sumps, catch basins or floor drains at the Site.

Pits, Ponds, Lagoons and Pools of Liquid

LFR did not observe pits, ponds, lagoons or pools of liquid at the Site.

Wells

LFR did not observe evidence of water supply wells, irrigation wells, or other wells at the Site.

Solid Waste

Solid waste dumpsters were located along the north side of the Site, for regular municipal pick-up.

LFR did not observe dumping of solid waste or construction debris on the Site.

Process Wastewater

LFR did not observe the generation or discharge of process wastewater at the Site.

Septic Systems/Sewer

The Site is connected to the City of Chicago sanitary sewer system. LFR did not observe evidence of an on-site septic system.

Source of Potable Water

The Site is connected to the public water system supplied and maintained by the City of Chicago.

Heating and Cooling Systems

The Site building is heated and cooled by roof-mounted package units powered by electricity.

Other Observations

No other significant interior or exterior observations were noted during the site inspection.

4.2 Standard Environmental Record Sources

LFR contracted with Environmental Data Resources, Inc. (EDR) to conduct a search of state and federal regulatory databases that provide information on the regulatory status of a property and incidents involving the use, storage, spills or transportation of hazardous materials and petroleum products at properties located within the radii specified by ASTM E 1527-05. A compilation of Federal and State database listings is provided in the EDR Radius Map Report in Appendix B.

The Site was not listed in the databases searched by EDR. Based upon their distance, regulatory status and/or inferred direction of groundwater flow, none of the off-site properties identified by the database search represent an issue of environmental concern.

4.3 Results of Site History/Land Use Review

4.3.1 Personnel Site Interviews

Interview with Owner/Key Site Manager

LFR interviewed Ms. Beth Jachimiec, the site assistant property manager and owner representative. Ms. Jachimiec was not aware of environmental issues at the property.

Interviews with Local Government Officials

LFR visited various municipal offices to review available records on file for the Site. Refer to the section below for additional information.

4.3.2 Municipal File Review

LFR submitted a FOIA request for information on the Site on July 17, 2009 and requested documents on file for the Site in the following departments: City of Chicago Building Department, Cook County Health Department, and the Chicago Department of the Environment. Additionally, LFR submitted a FOIA request on July 17, 2009 to the Illinois Environmental Protection Agency (IEPA) Bureau of Land, Bureau of Air, Bureau of Water, and Office of Emergency Response, and the Office of the State Fire Marshal (OSFM) for information on file for the Site.

The IEPA did not have records pertaining to the Site. The Chicago Department of the Environment maintained two building permits for the installation of one 1,000-gallon fuel oil UST and one 500-gallon naphtha UST in February and April 1949, respectively. The permits were issued to Robertson & Company, the Site occupant at that time. The OSFM did not have permit records for installation or removal of the USTs. None of the agencies maintained records of releases or environmental incidents for the Site. A copy of the UST installation permits is included in Appendix F.

4.3.3 Aerial Photographs

LFR reviewed aerial photographs provided by EDR for the years 1951, 1963, 1972, 1983, 1988, 1994, 2005 and 2006. The review of these aerial photographs identified the following information:

1951: The southern portion of the Site is occupied by a commercial-type building. The northern portion of the Site is vacant. Surrounding the Site are various commercial and residential properties.

1963: Similar to the 1951 photograph.

1972: Similar to the 1963 photograph.

1983: Due to the poor quality of the aerial photograph, details of the Site and surrounding properties are difficult to determine. The Site appears to be similar to the 1972 photograph.

1988: The Site is occupied by a commercial-type building. Surrounding the Site are various commercial and residential properties.

1994: Similar to the 1988 photograph.

2005/2006: The Site and adjacent properties generally appear to be as observed during LFR's recent Site reconnaissance.

Refer to Appendix C for copies of the foregoing aerial photographs obtained from EDR.

4.3.4 Fire Insurance Maps

LFR reviewed Sanborn Fire Insurance (Sanborn) maps provided by EDR for the years 1924, 1951, 1975, 1987, 1991, 1993, 2002, and 2004. The review of these Sanborn maps identified the following information:

1924: The Site appears to be undeveloped. One building identified as a dwelling abuts to the west and two small storage structures abut to the northwest. Undeveloped property abuts to the north and east. Belmont Avenue abuts the Site to the south, across which is undeveloped property.

1951: The southern portion of the Site is occupied by a commercial building labeled as "wallpaper and paints" and the northern portion of the Site is vacant. There is no evidence of the fuel oil or naphtha tanks at the Site. The Site address is 5740-5742 Belmont Avenue. Several buildings identified as stores abut the Site to the east and west. A dwelling abuts to the northwest and undeveloped land abuts to the north. A filling station with eight gasoline tanks is located to the south of the Site, across Belmont Avenue.

1975: The entire Site area is occupied by a building identified as a store and storage. The Site is surrounded by mixed commercial and residential properties. The filling station no longer appears across Belmont Avenue to the south of the Site.

1987: The Site and surrounding properties are similar to the 1975 map.

1991: The Site and surrounding properties are similar to the 1987 map.

1993: The Site and surrounding properties are similar to the 1991 map.

2002: The Site and surrounding properties are similar to the 1993 map.

2004: The Site and surrounding properties are similar to the 2002 map.

Refer to Appendix C for copies of the foregoing Sanborn maps obtained from EDR.

4.3.5 City Directories

LFR contracted EDR to conduct a city directory search for the Site. EDR reviewed city directories for the Site for the years 1923-2005 in approximately five-year intervals (as available). According to the EDR report, the Site address was first listed in 1951. A summary of the city directory information follows:

- 1941:** The Site is not listed. Surrounding listings are various residential and commercial uses, including a service station adjacent to the south of the Site.
- 1947:** The Site is not listed. Surrounding listings are various residential and commercial uses, including a service station adjacent to the south of the Site.
- 1951:** The Site is listed as Robertson & Company Paints General Offices. Surrounding listings are various residential and commercial uses.
- 1957:** The Site is listed as Robertson & Company Paints General Offices. Surrounding listings are various residential and commercial uses.
- 1966:** The Site is listed as Schulkin Sporting Goods and Camera Shop. Surrounding listings are various residential and commercial uses.
- 1971:** The Site is not listed. Surrounding listings are various residential and commercial uses.
- 1976:** The Site is listed as Schulkin Sporting Goods and Camera Shop. Surrounding listings are various residential and commercial uses.
- 1978:** The Site is as Schulkin Sporting Goods and Craigin Federal Savings and Loan. Surrounding listings are various residential and commercial uses.
- 1982:** The Site is listed as Craigin Federal Savings and Loan. Surrounding listings are various residential and commercial uses.
- 1984:** The Site is listed as Craigin Federal Savings and Loan. Surrounding listings are various residential and commercial uses.
- 1988:** The Site is listed as Craigin Federal Savings and Loan. Surrounding listings are various residential and commercial uses.
- 1991:** The Site is listed as Craigin Federal Savings and Loan. Surrounding listings are various residential and commercial uses.
- 1995:** The Site is listed as Craigin Federal Savings and Loan. Surrounding listings are various residential and commercial uses.
- 1999:** The Site is listed as LaSalle Bank. Surrounding listings are various residential and commercial uses.
- 2005:** The Site is not listed. Surrounding listings are various residential and commercial uses.

The EDR City Directory Abstract is included in Appendix C.

4.3.6 Topographic Maps

Topographic maps were obtained from EDR for the years 1901, 1928, 1948, 1953, 1963, 1972, 1978, 1993 and 1997. All the topo maps depict the Site and surrounding properties as being in an urban area.

The EDR Topographic Map report is included in Appendix C.

4.4 Synopsis of Previous Environmental Investigations

LFR was not provided with prior ESA reports for the Site.

4.5 User Provided Information

Ms. Beth Jachimiec, assistant property manager, completed a User Questionnaire on behalf of Bank of America. The User Questionnaire is provided in Appendix D.

4.5.1 Title Records

Title records were not provided to LFR for review.

4.5.2 Environmental Liens or Activity and Use Limitations

The representative of the client was asked the following questions as part of the assessment:

- Are you aware of any environmental cleanup liens that have been filed or recorded against the Site under federal, tribal, state, or local law? **Answer:** Unknown
- Are you aware of any activity or land use limitations, such as engineering controls, land use restrictions, or institutional controls, that are in place at the Site and/or have been filed or recorded against the Site in a registry under federal, tribal, state, or local law? **Answer:** Unknown

4.5.3 Specialized Knowledge

The representative of the Client was asked the following questions as part of the assessment:

- Do you have any specialized knowledge or experience related to the Site or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the Site or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business? **Answer:** No

- Are you aware of commonly known or reasonably ascertainable information about the Site that would help the environmental professional to identify conditions indicative of releases or threatened releases? **Answer:** Unknown
- Do you know the past uses of the Site? **Answer:** Unknown
- Do you know of specific chemicals that are present or once were present at the Site? **Answer:** Unknown
- Do you know of spills or other chemical releases that have occurred at the Site? **Answer:** Unknown
- Do you know of any environmental cleanups that have occurred at the Site? **Answer:** Unknown
- Do you know of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the Site? **Answer:** Unknown
- Do you know of any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the Site? **Answer:** Unknown
- Do you know of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products? **Answer:** Unknown

4.5.4 Commonly Known or Reasonably Ascertainable Information

The representative of the Client was asked the following question as part of the assessment:

- Based on your knowledge and experience related to the Site, are there any obvious indicators that point to the presence or likely presence of contamination at the Site? **Answer:** No

4.5.5 Valuation Reduction for Environmental Issues

Since Bank of America or related subsidiary is the current owner of the Site, Bank of America has not conducted an analysis of a hypothetical prospective purchase price.

4.5.6 Owner, Property Manager and Occupant Information

According to the Cook County Assessor's Office, the Site is owned by Bank of America. The Site is currently occupied by Bank of America.

4.5.7 Reason for Performing Phase I

The Phase I ESA is being performed to evaluate the present environmental status of the Site.

4.5.8 Other Information

No other pertinent information is available.

4.6 Results of Limited ACM Screening

LFR reviewed a Limited Asbestos Survey Report completed by LFR, Inc., dated March 15, 2008 that summarized the collection of suspect ACM taken prior to new equipment installation within the banking center. A total of 48 samples of ceiling tile, gypsum board, joint compound, wallpaper glue, cove base and mastic, carpet mastic, 12" x 12" beige and brown ceramic floor tile, 12" x 12" beige floor tile and mastic, 18" x 18" beige and tan floor tile and mastic, 2" x 2" beige ceramic floor tile, plaster, brick mortar, silver and black vapor barrier, and HVAC duct insulation. The 12" x 12" beige floor tile and mastic in the east storage room and server room were found to have 1-5% Chrysotile. None of the other materials sampled and analyzed contained asbestos.

A copy of the asbestos survey report is included in Appendix E.

4.7 Results of Radon Investigation

The Site building is used for commercial purposes and testing for radon was not conducted as part of this assessment.

4.8 Results of Mold Investigation

LFR did not conduct a mold investigation as part of this assessment.

5.0 FINDINGS AND CONCLUSIONS

5.1 Known or Suspect RECs

Based upon the information obtained during the Phase I ESA, this assessment has revealed the following REC in connection with the Site:

- Historical information for the Site has identified building permits for the installation of one 1,000-gallon fuel oil UST and one 500-gallon naphtha UST in February and April 1949. The permits were issued to Robertson & Company which, according to city directories and a 1949 Sanborn Fire Insurance map, formerly occupied the Site. The location of the USTs are not shown on the 1949 Sanborn map and no information regarding the removal of these USTs was found in state or local agency files or in the EDR database report. The Site address has not changed according to the historical information reviewed.

5.2 De minimis Conditions

No *de minimis* conditions were identified during this assessment.

5.3 Deviations/Data Gaps

The report deviates from the ASTM E1527-05 standard in that it has been prepared in accordance with a table of contents recommended by Bank of America. The informational content of the report and the objective of the Phase I ESA generally conform to the standard.

Not being able to trace the use of the property back to 1940, or its first developed use, whichever is earlier represents a data gap as defined by ASTM E1527-05. However, LFR opines that such data gaps do not prevent the ability of LFR to render the following conclusion.

5.4 Conclusions

LFR has performed a Phase I Environmental Site Assessment (ESA) in general conformance with the scope and limitations of ASTM Practice E 1527 of 5742 West Belmont Avenue in Chicago, Cook County, Illinois. Any exceptions to, or deletions from, this practice are described in Section 5.3 of this report. This assessment has revealed no evidence of RECs in connection with the Site with the exception of the two USTs permitted for the Site in 1949. Because there is no removal documentation, it is possible that the USTs may exist at the Site; however, the tanks may be located beneath the current Site building.

6.0 LIMITATIONS

The opinions and recommendations presented in this report are based upon the scope of services, information obtained through the performance of the services, and the schedule as agreed upon by LFR and the original party for whom this report was originally prepared. This report is an instrument of professional service and was prepared in accordance with the generally accepted standards and level of skill and care under similar conditions and circumstances established by the environmental consulting industry. To the extent that LFR relied upon any information prepared by other parties not under contract to LFR, LFR makes no representation as to the accuracy or completeness of such information. Only the party for whom this report was originally prepared, and other specifically named parties, may make use of and rely upon the information in this report, in its entirety, for a period not to exceed 180 days in accordance with the American Society for Testing and Materials' (ASTM's) "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process" ASTM Designation E 1527-00 dated May 10, 2000, ASTM's "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process" ASTM Designation E 1527-05 dated November 1, 2005, and/or the Code of Federal Regulations (CFR) 40CFR Part 312 "Standards and Practices for All Appropriate Inquiries: Final Rule" dated November 1, 2005. After 180 days and prior to using the information contained herein, the report should be updated in accordance with ASTM Standards and Federal regulations.

The findings presented in this report apply solely to site conditions existing at the time when LFR's assessment was performed. It must be recognized, however, that an Environmental Site Assessment ("ESA") is intended for the purpose of evaluating the potential for contamination through limited research and investigative activities and in no way represents a conclusive or complete site characterization. Conditions in other parts of the project site may vary from those at the locations where data were collected. LFR's ability to interpret investigation results is related to the availability of the data and the extent of the investigation activities. As such, 100% confidence in ESA conclusions cannot reasonably be achieved.

LFR, therefore, does not provide any guarantees, certifications, or warranties (express or implied) that a property is free from environmental contamination. Furthermore, nothing contained in this document shall relieve any other party of its responsibility to abide by contract documents and all applicable laws, codes, regulations, or standards.

8.0 STATEMENT OF ENVIRONMENTAL PROFESSIONAL(S)

We declare that, to the best of our professional knowledge and belief, we meet the definition of environmental professional as defined in §312.10 of 40 C.F.R. 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 C.F.R. Part 312.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 11/12/2008 has revealed that there are 5 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 11/12/2008 has revealed that there are 2 RCRA-CESQG sites within approximately 0.25 miles of the target property.

LUST TRUST: In case sufficient funds are not available in the Underground Storage Tank Fund, requests for payment are entered on the Payment Priority List by "queue date" order. As required by the Environmental Protection Act, the queue date is the date that a complete request for partial or final payment was received by the Agency. The queue date is "officially" confirmed at the end of the payment review process when a Final Decision Letter is sent to the site owner.

A review of the LUST TRUST list, as provided by EDR, and dated 05/15/2009 has revealed that there is 1 LUST TRUST site within approximately 0.5 miles of the target property.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

EDR Historical Auto Stations: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc.

A review of the EDR Historical Auto Stations list, as provided by EDR, has revealed that there are 2 EDR Historical Auto Stations sites within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

EDR Historical Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc.

A review of the EDR Historical Cleaners list, as provided by EDR, has revealed that there are 3 EDR Historical Cleaners sites within approximately 0.25 miles of the target property.

ACES (Illinois - Agency Compliance And Enforcement System) is the Illinois EPA Project to facilitate the permitting operations

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:

U.S. importer of hazardous waste: Unknown
Mixed waste (haz. and radioactive): Unknown
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: Unknown
Furnace exemption: Unknown
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No
Off-site waste receiver: Commercial status unknown

Hazardous Waste Summary:

Waste code: D000
Waste name: Not Defined

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: F002
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE,

ACES (Illinois - Agency Compliance And Enforcement System) is the Illinois EPA Project to facilitate the permitting operations

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 02/02/2009	Source: EPA
Date Data Arrived at EDR: 02/12/2009	Telephone: N/A
Date Made Active in Reports: 03/30/2009	Last EDR Contact: 04/20/2009
Number of Days to Update: 46	Next Scheduled EDR Contact: 07/27/2009
	Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/23/2009	Source: EPA
Date Data Arrived at EDR: 04/28/2009	Telephone: N/A
Date Made Active in Reports: 05/19/2009	Last EDR Contact: 04/20/2009
Number of Days to Update: 21	Next Scheduled EDR Contact: 07/27/2009
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267
Date Made Active in Reports: 03/30/1994	Last EDR Contact: 05/17/2009

	Data Release Frequency: No Update Planned

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 02/02/2009	Source: EPA
Date Data Arrived at EDR: 02/12/2009	Telephone: N/A
Date Made Active in Reports: 03/30/2009	Last EDR Contact: 04/20/2009
Number of Days to Update: 46	Next Scheduled EDR Contact: 07/27/2009
	Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Transporters, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Local Lists of Hazardous waste / Contaminated Sites

CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Data Release Frequency: No Update Planned

EDR Historical Auto Stations: EDR Proprietary Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 12/31/2006

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: PennWell Corporation
Telephone: (800) 823-6277

This map includes information copyrighted by PennWell Corporation. This information is provided on a best effort basis and PennWell Corporation does not guarantee its accuracy nor warrant its fitness for any particular purpose. Such information has been reprinted with the permission of PennWell.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

USGS TOPOGRAPHIC MAP

Target Property Map:	41087-H7 RIVER FOREST, IL
Most Recent Revision:	1997

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ENE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Target Property County</u>	<u>FEMA Flood</u>
COOK, IL	<u>Electronic Data</u>
	YES - refer to the Overview Map and Detail Map

<u>NWI Quad at Target Property</u>	<u>NWI Electronic</u>
RIVER FOREST	<u>Data Coverage</u>
	Not Available

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data:*

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION</u> <u>FROM TP</u>	<u>GENERAL DIRECTION</u> <u>GROUNDWATER FLOW</u>

* ©1996 Site-specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBANLAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Bedrock Max: > 0 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	60 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam
fine sandy loam
loam
fine sand

Surficial Soil Types: silt loam
fine sandy loam
loam
fine sand

Shallow Soil Types: sandy loam

Deeper Soil Types: silt loam
sand
loamy sand
loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

Certified Sanborn® Map Report Enhancements for 2009

The accompanying Certified Sanborn Map Report reflects a number of enhancements that make it easier for you to review these historical maps. EDR has digitally joined together the more than one million fire insurance maps from the Sanborn Library collection so that your target property is centered, making it easier for you to review adjoining properties. Here is a list of the new features:

- Your target property is centered on each map. You can quickly locate your target property and view adjoining properties. Plus, adjoining properties are included more often, reducing your need to refer to additional maps.
- All maps are now displayed at a uniform scale. This makes it easier for you to view changes to the property over time.
- We've increased coverage by adding thousands of new maps from 40 cities for years 1994-2007.
- A new Map Key and Sheet Thumbnails let you reference sheet numbers, year and volume of original Sanborn Map panels used for this report.

For more information about the new enhancements to the Certified Sanborn Map Report, contact your EDR representative at 800-352-0050.

2009 Enhancements to EDR City Directory Abstract

New for 2009, the EDR City Directory Abstract has been enhanced with additional information and features. These enhancements will make your city directory research process more efficient, flexible, and insightful than ever before. The enhancements will improve the options for selecting adjoining properties, and will speed up your review of the report.

City Directory Report. Three important enhancements have been made to the EDR City Directory Abstract:

1. *Executive Summary.* The report begins with an Executive Summary that lists the sources consulted in the preparation of the report. Where available, a parcel map is also provided within the report, showing the locations of properties researched.
2. *Page Images.* Where available, the actual page source images will be included in the Appendix, so that you can review them for information that may provide additional insight. EDR has copyright permission to include these images.
3. *Findings Listed by Location.* Another useful enhancement is that findings are now grouped by address. This will significantly reduce the time you need to review your abstracts. Findings are provided under each property address, listed in reverse chronological order and referencing the source for each entry.

Options for Selecting Adjoining Properties. Ensuring that the right adjoining property addresses are searched is one of the biggest challenges that environmental professionals face when conducting city directory historical research. EDR's new enhancements make it easier for you to meet this challenge. Now, when you place an order for the EDR City Directory Abstract, you have the following choices for determining which addresses should be researched.

1. *You Select Addresses and EDR Selects Addresses.* Use the "Add Another Address" feature to specify the addresses you want researched. Your selections will be supplemented by addresses selected by EDR researchers using our established research methods. Where available, a digital map will be shown, indicating property lines overlaid on a color aerial photo and their corresponding addresses. Simply use the address list below the map to check off which properties shown on the map you want to include. You may also select other addresses using the "Add Another Address" feature at the bottom of the list.
2. *EDR Selects Addresses.* Choose this method if you want EDR's researchers to select the addresses to be researched for you, using our established research methods.
3. *You Select Addresses.* Use this method for research based solely on the addresses you select or enter into the system.
4. *Hold City Directory Research Option.* If you choose to select your own adjoining addresses, you may pause production of your EDR City Directory Abstract report until you have had a chance to look at your other EDR reports and sources. Sources for property addresses include: your Certified Sanborn Map Report may show you the location of property addresses; the new EDR Property Tax Map Report may show the location of property addresses; and your field research can supplement these sources with additional address information. To use this capability, simply click "Hold City Directory research" box under "Other Options" at the bottom of the page. Once you have determined what addresses you want researched, go to your EDR Order Status page, select the EDR City Directory Abstract, and enter the addresses and submit for production.

Questions? Contact your EDR representative at 800-352-0050. For more information about all of EDR's 2009 report and service enhancements, visit www.edrnet.com/2009enhancements

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1923 through 2005. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 100 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

APPENDIX D

User Provided Information

Phase I Environmental Site Assessment Questionnaire

(User Provided Information Questionnaire)

Date: 7-24-09

Site Name: Belmont & Central

Your Name: Beth Tachimie

Site Location: 5742 N Central Ave

Your Title: Asst. Property Manager

Relationship to Site: ☐ Owner ☐ Occupant ☐ Purchaser ☒ Other

Length of Time Associated with Site: 8 months

Please review and complete this questionnaire which will assist LFR in completing our site assessment. If sufficient space is not provided, please complete your response on a separate sheet of paper and attach it to this questionnaire.

1. Are you aware of any environmental cleanup liens against the Site that are filed or recorded under federal, tribal, state or local law?

☐ Yes

☐ No

☒ Unknown

☐ N/A

If Yes, please explain: _____

2. Are you aware of any activity or land use limitations, such as engineering controls (for contaminant control), land use restrictions or institutional controls, that are in place at the Site and/or have been filed or recorded in a registry under federal, tribal, state or local law?

☐ Yes

☐ No

☒ Unknown

☐ N/A

If Yes, please explain: _____

3. Do you have any specialized knowledge or experience related to the Site or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the Site or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

☐ Yes ☒ No ☐ Unknown ☐ N/A

If Yes, please explain: _____

4. Are you aware of commonly known or reasonably ascertainable information about the Site that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user,

a) Do you know the past uses of the Site?

☐ Yes ☐ No ☒ Unknown ☐ N/A

If Yes, please explain: _____

b) Do you know of specific chemicals that are present or once were present at the Site?

☐ Yes ☐ No ☒ Unknown ☐ N/A

If Yes, please explain: _____

c) Do you know of chemical spills that have taken place at the Site?

☐ Yes ☐ No ☒ Unknown ☐ N/A

If Yes, please explain: _____

d) Do you know of any environmental cleanups that have taken place at the Site?

☐ Yes ☐ No ☒ Unknown ☐ N/A

If Yes, please explain: _____

e) Do you know if any fill material has been imported to the Site?

☐ Yes ☐ No ☒ Unknown ☐ N/A

If Yes, please explain: _____

5. Do you know of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the Site?

☐ Yes ☐ No ☒ Unknown ☐ N/A

If Yes, please explain: _____

6. Do you know of any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the Site?

☐ Yes ☐ No ☒ Unknown ☐ N/A

If Yes, please explain: _____

7. Do you know of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products at the Site?

☐ Yes ☐ No ☒ Unknown ☐ N/A

If Yes, please explain: _____

8. Based on your knowledge and experience related to the Site are there any obvious indicators that point to the presence or likely presence of contamination at the Site?

☐ Yes ☐ No ☒ Unknown ☐ N/A

If Yes, please explain: _____

9. Does the Site's purchase price reasonably reflect the fair market value of the property?

☐ Yes

☐ No

☒ Unknown

☐ N/A

If No, do you know the reason for lower purchase price? Is it possible that the lower purchase price is because of contamination known or believed to be present at the Site?

☐ Yes

☐ No

☒ Unknown

☐ N/A

If Yes, please explain:

APPENDIX E

Asbestos Sample Results

ENVIRONMENTAL MANAGEMENT & CONSULTING ENGINEERING

March 15, 2008

Project No. 009-11638-00

Mr. Dennis McInerney
Bank of America
Corporate Workplace Environmental Risk Department
Mailstop CT2-545-02-01
200 Glastonbury Blvd.
Glastonbury, CT 06033

Re: Technology/Equipment Installation Asbestos Survey
5742 West Belmont Avenue (Belmont/Central)
Chicago, IL 60634
Mail Code: IL4-311

Dear Mr. McInerney:

LFR Inc. (LFR) conducted a Comprehensive Asbestos Survey at the above-referenced retail banking facility (Site) for Bank of America. The focus of the survey was to identify if specific building materials with potential to be disturbed during the installation of new equipment are asbestos-containing building materials (ACBMs). Background information on the Site, a summary of the asbestos survey as well as the inspector's certification and license are provided below.

Background Information

The Site is a retail banking facility in a single-story stand-alone structure situated in a commercial/residential area of Chicago, Illinois. The date of the building construction is unknown. There are approximately 6,250 square feet of floor space in the banking center. Construction of the Site building appeared to be wood frame with a brick exterior façade, glass windows and doors. Interior finished walls are primarily drywall with associated joint compound, finished with paint or wallpaper. The perimeter walls of the building are plaster. Ceilings are comprised of 2'x 2' suspended acoustic ceiling tiles, above which is plaster. The flooring is a mixture of vinyl floor tile with mastic, ceramic tile with associated grout and adhesive and carpeting overlaying the sub-floor. The Thermal System Insulation (TSI) observed in the building was fiberglass pipe insulation. Spray-on fireproofing was not observed at the site.

Asbestos Survey

The survey was performed on February 25, 2008 by Mr. Benito Castillo of LFR. A copy of Mr. Castillo's Illinois Asbestos Inspector License and current Certificate are provided in Attachment A. During the inspection, a total of 19 homogeneous applications were identified for sampling and a total of 48 bulk samples were collected and submitted for laboratory analyses. The results of the asbestos survey are presented on the Homogenous Application Table in Attachment B.

530 Tollgate Road, Suite D
Elgin, Illinois 60123
Offices Nationwide

847.695.8855 m
847.695.7799 f
www.lfr.com

The bulk sample laboratory data package and chain of custody are presented in Attachment C. A site plan denoting sample collection locations is presented in Attachment D and photographs of the homogenous applications are presented in Attachment E. The asbestos inspection Limitations and Service Constraints are presented in Attachment F.

During the survey, the following areas, which were intended to be included in the survey, were not accessible to LFR:

- Wall cavities
- The ceramic floor tile and associated grout/mastic in the restrooms were not sampled due to concerns for occupant safety and the potential to severely damage the tile.

Certification

The Comprehensive Asbestos Survey described herein was conducted by the undersigned of LFR. LFR's investigation consisted solely of the activities described herein and is subject to the Limitations and Service Constraints in Appendix F.

Sincerely,

A handwritten signature in black ink, appearing to read 'James J. Young', written in a cursive style.

Mr. James J. Young
Project Manager
IL Asbestos Inspector No. 100-05203

Limitations and Service Constraints

LIMITATIONS AND SERVICE CONSTRAINTS

Asbestos Related Services

All professional opinions presented in this report are based on information made available to us either by review of data provided by others or data gathered by LFR personnel.

LFR affirms that data gathered and presented by LFR in this report was collected in an appropriate manner in accordance with generally accepted methods and practices. LFR cannot be responsible for decisions made by our client solely on the basis of economic factors.

Conditions described in this report are as found at the time of investigation, unless otherwise stated.

LFR analyzed only the substances, conditions and locations described in the report at the time indicated. No inferences regarding other substances, conditions, location or time can be made unless specifically stated in this report.

No recommendations were provided for materials containing less than one- percent asbestos. Materials containing less than one percent asbestos do not meet either the generally accepted industry definition of asbestos-containing material (any material containing greater than one percent asbestos) or the EPA definition of friable ACM (any material friable bulk insulation material contain greater than one percent asbestos by weight as analyzed by Polarized Light Microscopy.) LFR, however, makes no statement, implied or explicit, about the hazards of materials containing less than one percent asbestos.

This report is intended for the use listed in the section of this report described as the Introduction. The use of this report in any manner other than that listed in the Introduction requires the written consent of LFR. This report must be presented in its entirety.

(312) 744-3586 (TTY)

<http://www.cityofchicago.org>

TO:

Stuart Engelle

You recently requested the City of Chicago's Department of Environment (CDOE) to search its files for information on the following:

5742 W. Belmont

At this time, and to the best of our knowledge, all information currently contained in CDOE's files regarding this address is enclosed. (CDOE was created on January 1, 1992. CDOE's Enforcement and Compliance Division formerly operated in the Department of Consumer Services; CDOE has inherited these files.)

In general, CDOE files include complaint/inspection/permit information in six areas:

- General Environmental (emissions, smoke, noise, etc.)
- Asbestos
- Hazardous Materials
- Underground Storage Tanks (USTs)
- Operational Compliance (permits for air-emission sources)
- Solid or Liquid Waste (recycling and handling permits)

If there is information in CDOE's files, it generally means that there has been a complaint resulting in a CDOE inspection, or that an annual permit is required from CDOE. If there is nothing in CDOE's files, it generally means CDOE has not received a complaint that resulted in an inspection, or that there is not a permit-requiring emission source. However, there may be problems CDOE has not been alerted to.

CDOE's information is from just one City of Chicago department. Other City departments (Buildings; Health; Water; Sewers; Streets and Sanitation; Zoning) and non-City agencies (Cook County; Illinois Environmental Protection Agency/IEPA; U.S. Environmental Protection Agency/USEPA) also may have separate information. None has information from the others; contact each separately.

Mail written request(s) and check(s) to CHICAGO DEPARTMENT OF ENVIRONMENT, or file request(s) in person:

Freedom of Information Officer - Iris L. Troutman-Heard
City of Chicago Department of Environment
30 N. LaSalle Street 25th Floor
Chicago, Illinois 60602
312/744-7606 (FAX 312/744-6451)

Addresses must be specific. CDOE cannot search for "anything in a five-block radius of the intersection of such and such." Use a separate request form for each individual address being requested (e.g., 600,610,620,630, etc; not "the even side of the street for a block" or "the northwest corner of the intersection of such and such"). Indicate if, to your knowledge, there is an active complaint written by any City of Chicago agency currently pending regarding each address; or if there is any kind of litigation pending regarding the address, whether or not it involves the City of Chicago or not. Include your FAX number; if there is nothing in the CDOE files, it is easier to FAX an answer.

APPENDIX G

Qualifications of Environmental Professionals

STUART C. ENGELKE

Staff II Geologist

*soil, groundwater, and surface water investigations
phase I and phase II environmental site assessments
environmental site remediation
hydrogeologic studies
construction management
soil vapor extraction monitoring
leaking underground storage tanks*

Mr. Engelke has 9 years professional experience involving engineering and construction management, including 4 years comprehensive experience in the field of geology and environmental geosciences, including Phase I and II environmental site assessments (ESAs), performing soil, groundwater, surface water sampling, and remediation activities. He also has experience completing field hydraulic conductivity tests and interpreting aquifer characteristics. In the U.S. Army, Mr. Engelke was a construction manager overseeing heavy equipment, including combat operations during an 11 month deployment throughout Iraq.

EDUCATION

Northern Illinois University: B.S. Geology & Environmental Geosciences, 2006

University of Wisconsin – Platteville: Studied in Reclamation Environmental Conservation

REPRESENTATIVE EXPERIENCE

- **Phase I Environmental Site Assessments**
Conducts Phase I ESAs for clients in accordance with the American Society for Testing and Materials standard.
- **Phase II Soil and Groundwater Investigations**
Subsurface investigations for clients using drilling and sampling methods to help characterize and assess the potential presence of contaminants of concern.
- **Former Asbestos Manufacturing Plant**
Perform routine groundwater gauging and sampling activities. Conduct landfill gas monitoring and sampling. Collected samples from soil borings, test pits, and near surface to investigate asbestos containing materials.
- **Chemical Manufacturing Plant**
Complete operation and maintenance (O&M), of a soil-vapor extraction system at a state superfund site. Conduct monitoring and routine maintenance of system, including piping and SVE system repair. Conduct SVE system sampling investigations to evaluate system performance.
- **Food Grade Chemical Production Plant**
Conduct soil and groundwater investigations at an operational chemical facility. Perform O&M on three separate groundwater remediation systems, including scheduled monitoring,

and sampling. Assist in hydrogeologic evaluation by testing aquifer permeability, hydraulic conductivity, and product recovery. Document site conditions and assist in quarterly report writing.

- **Brownfield Development Projects**

Conduct soil and groundwater investigations for projects enrolled in the Illinois Site Remediation Program. Completed soil borings for vertical and horizontal delineation of impact. Installed monitoring wells and collected groundwater samples to determine impact of contaminants. Conducted hydraulic conductivity testing of groundwater monitoring wells for completion contaminant transport modeling. Provided oversight during soil excavations. Assist in writing state agency Site Investigation Reports.

- **Leaking Underground Storage Tank, Soil Remediation**

Responsible for subcontractor oversight during removal and backfill of 7,500 cubic yards of soil at a former automobile dealership. Collected confirmatory samples for field and laboratory testing. Installed, sampled, and abandoned monitoring wells for post remediation groundwater assessment. Assisted in writing the Corrective Action Completion Report for the Illinois LUST program where site received letter of no further remediation.

- **Superfund Site work**

Involved with collecting, sampling, and monitoring a million gallon-per-day groundwater extraction and treatment system for a Superfund project. Scope of work includes O&M, groundwater sampling and weekly site inspections.

- **Electric Utility Company**

Completed geotechnical soil borings and collected soil samples for due diligence support and limited site investigation. Perform soil resistivity tests to aid in the design of grounding systems for electrical substations.

MILITARY EXPERIENCE

- **Construction Management**

Responsible for supervising employment and maintenance of equipment in support of construction operation, estimates, equipment, and operator requirements for specific jobs. Directed combat engineering operations.

- **Heavy Equipment Operations**

Specialized in and military license for: 22 ton truck mounted crane, hydraulic excavator, road grader, tractor scraper, vibratory roller, backhoe, 5 yard scoop loader, steel wheeled compactor, retractable forklift, 18 ½ ton dump truck, 5 ton dump truck, and various light-wheeled equipment.

- **Deployments**

Involved in full time missions around the world, for extended periods of time, including:

- Operation Iraqi Freedom; Total of 18 months, including 11 months conducting combat engineering missions throughout Iraq, stationed at Camp Speicher in Tikrit
- Schofield Barracks, Hawaii; Dole Plantation, Building construction and development

- o Kwajelien, Marshall Islands; School and clinic construction
- o Juigalpa, Nicaragua; Joint Task Force Chontales, schools, hospitals, and roads
- o Ajo, Arizona; Task Force Diamondback, Mexican border control construction
- o Metlakatla, Alaska; Operation Alaskan Road, Ketchikan Island road construction
- **Mobilizations**
Involved in numerous local, state, and federal funded projects including:
 - o Emergency humanitarian aid missions
 - o Flood clean up and disaster repairs
 - o Runway construction and extension
 - o School parking lot and sports field construction
 - o Childrens camp construction and facility repair
 - o Clearing, grubbing, and leveling operations, slope contouring and terracing
 - o Stormwater retention, drainage, and erosion prevention
 - o Subgrade road construction, shoulder repair, ditching, and trenching

AWARDS RECEIVED

Soldier of the Year- 264th Engineer Battalion- 2003, Army Commendation Medal, Army Achievement Medal, Meritorious Service Medal, Wisconsin Military Achievement Award- 2004, Overseas Campaign Ribbon, and Operation Enduring Freedom Ribbon.

CERTIFICATIONS

40-Hour OSHA Health and Safety Training per 29 CFR 1910.120

8-Hour OSHA Refresher Training (annual) per 29 CFR 1910.120

24-Hour AHERA Building Inspector Training per EPA 40 CFR 763

Hazardous Materials Security Awareness per 49 CFR 172.700, U.S. DOT Regulation

PROFESSIONAL HISTORY

LFR Inc., Staff II Geologist, 2007-date

Marlin Environmental Inc., Project Geologist, 2006 to 2007

The Home Depot, Sales Associate, 2004 to 2006

Army National Guard, 229th Engineer Company, 1999 to 2008

DOUGLAS M. LINDSAY, P.G.
Senior Project Geologist

*hydrogeologic investigations
project management
LSP MCP services
soil and groundwater management*

Mr. Lindsay has over 12 years of experience involving subsurface and hydrogeologic investigations, contaminated soil and groundwater management, state and federal regulatory compliance, environmental remediation programs, and American Society for Testing and Materials (ASTM) due diligence. Related projects have included the management of extensive state and federal environmental investigations, subsurface soil and groundwater precharacterization programs, asbestos assessments, lead paint screening, radon sampling, and soil, groundwater, and ambient air field screening. Mr. Lindsay has also conducted groundwater elevation surveys, fate and transport modeling, groundwater and surface water sampling, soil sampling, and soil gas sampling.

Mr. Lindsay has supervised and managed numerous projects simultaneously including operation and maintenance (O&M) of groundwater remediation systems, construction project management, contaminated soil and groundwater management, soil vapor extraction systems, dewatering systems, risk assessments, underground storage tank removals, and Massachusetts Contingency Plan (MCP) regulatory reports. Mr. Lindsay is also involved with researching and evaluating environmental liabilities and determining the cost/benefit analysis associated with applicable remedial measures. Mr. Lindsay manages field staff personnel on the completion of multiple projects.

EDUCATION

B.A. Environmental Science, Boston University, 1995

The School for Field Studies, Rainforest Ecology, Belize, Central America

REPRESENTATIVE EXPERIENCE

- **Subsurface Investigation, Soil Management and Regulatory Closure, Worcester, Massachusetts.** LFR was retained by a private developer for the proposed construction of a retail pharmacy on a property formerly occupied by a truck fueling terminal and lumber yard. Mr. Lindsay oversaw the completion of an ASTM Phase I Environmental Site Assessment and Phase II Subsurface Investigation to investigate potential impacts from former gasoline and diesel fuel aboveground and underground storage tanks. A total of 35 soil borings and 6 monitoring wells were completed to evaluate the nature and extent of soil and groundwater contamination. Based on the results of the sampling data, Mr. Lindsay coordinated the removal of 50 cubic yards of petroleum-contaminated soil for off-site recycling. Results of a site-specific risk characterization concluded that a condition of no significant risk existed. Mr.

Lindsay prepared a Class A-2 Response Action Outcome (RAO) in closure report accordance with the MCP.

- **Construction Management, Soil Disposal Coordination and Tank Removal Activities, Kuss Middle School, Fall River, Massachusetts.** LFR was retained by an earthwork contractor to provide construction management activities and soil disposal coordination during excavation activities associated with the construction of a new middle school building. The property was formerly occupied by textile mill buildings and previous soil sampling results identified contaminated urban fill material which required off-site disposal. During soil excavation activities a 1,000-gallon abandoned underground storage tank was discovered. Mr. Lindsay supervised the removal of the tank, arranged for disposal of the tank and associated soil, and prepared a tank closure report in accordance with tank closure guidance and the Massachusetts Contingency Plan. Mr. Lindsay characterized and coordinated the removal of 1,570 tons of urban fill soils to a Massachusetts Unlined Landfill and a soil recycling facility.
- **MCP and US EPA TSCA Site Closure, Hingham Shipyard – East Side Fill Area, Hingham, Massachusetts.** At the request of a private developer, LFR was retained to delineate and remove PCB-contaminated soil from an area proposed for future residential development. Following the submittal of a US EPA-approved Self-Implementing Plan and a MassDEP-approved Release Abatement Measure (RAM) Plan, Mr. Lindsay oversaw a soil precharacterization program designed to select off-site disposal facilities for the PCB soil. Confirmatory soil samples were collected from test pits at 10-foot sampling frequencies to delineate areas of PCBs containing either greater than or less than 50 mg/kg. Discrete soil samples were collected and analyzed for PCBs in the field with a US EPA-conditionally accepted Dexsil L2000 DX screening instrument. In addition, two overburden and two bedrock groundwater monitoring wells were installed and sampled to assess groundwater conditions. Following the removal of 6,910.13 tons of greater than 50 mg/kg PCB soils and 8,240.47 tons of non-hazardous PCB soil, a site-specific risk assessment concluded that remaining PCB concentrations in soil were below the most-stringent residential cleanup criteria. Mr. Lindsay prepared a Completion of Self-Implementing Plan report and a RAM Completion and Class A-2 RAO report.
- **Precharacterization Program, Readville 5 MBTA Yard, Dedham, Massachusetts.** LFR was retained by a developer interested in constructing residential properties on a former 40-acre rail yard. Mr. Lindsay assisted in the development of a soil precharacterization sampling plan in accordance with MassDEP protocol. Mr. Lindsay supervised a total of 250 test pits in GPS-surveyed locations over a two-week period. As part of the management plan, 900 soil samples were field screened in-situ for RCRA 5 metals with an XRF instrument. The depth of fill material was determined at each location and concentrations of arsenic and lead were presented through 3-D visualization software to the client. Construction management and soil remediation alternatives have been presented at public meetings and will be implemented following public and MassDEP comment.
- **Precharacterization Program, JFK School, Waltham, Massachusetts.** Prior to overseeing field activities, Mr. Lindsay prepared a Soil Management Plan, Construction Materials Management Plan, and a worker Health & Safety Plan for construction activities. Following numerous meetings with the client, Mr. Lindsay identified and selected areas to be sampled as part of a large-scale soil characterization program involved with the redevelopment of the JFK Middle School. A total of 25 test pits were excavated in areas proposed for excavation for foundations and subsurface utilities. Soil quantities were calculated and determined to be

either regulated or unregulated materials. In order to meet stringent project deadlines, facility approvals were expedited and materials transported off-site were managed and documented. A total of 4,500 cubic yards of soil was transported to unlined landfills.

- **Underground Storage Tank Closures and Immediate Response Action, Charlestown, Massachusetts.** Prior assessments performed by LFR had identified the potential for historic USTs at a former rubber manufacturing facility. Since the facility was proposed for residential development, Mr. Lindsay supervised the completion of a supplemental subsurface investigation. Following the identification of two 'benzol' USTs through a GPR survey, a closure strategy was implemented to meet client and MassDEP expedited deadlines. Following MassDEP approvals, an immediate response action was undertaken in response to petroleum contamination in the vicinity of the USTs. Mr. Lindsay oversaw the removal and disposal of the USTs and contaminated soil and groundwater in accordance with the MCP. Mr. Lindsay prepared a response action outcome closure report for site closure in accordance with the MCP.
- **Precharacterization Programs, Logan International Airport, East Boston, Massachusetts.** Mr. Lindsay oversaw four separate soil and groundwater precharacterization programs associated with the redevelopment of the Terminal A area. Activities included supervising the advancement of 80 soil borings and test pits, the installation of monitoring wells, and the collection of 200 soil and groundwater samples. Laboratory analysis results were utilized to characterize the soils and select the most appropriate, cost-effective disposal facilities for the soils. Mr. Lindsay was also responsible for managing field staff and prepared comprehensive reports documenting the findings of the investigations. A total of 270,000 tons of soil was characterized, removed, and transported to 23 Massport and MassDEP-approved facilities. Detailed coordination with the client, subcontractors, and state officials was necessary to complete the project in an organized and timely manner. Additional responsibilities included spill management, health and safety oversight, air sampling, and the operation of temporary groundwater treatment systems for isolated jet-A fuel-impacted areas.
- **Soil Disposal Management/Subcontractor Coordination, Former Mystic Station Power Generating Facility, Everett, Massachusetts.** A total of 60,000 tons of No. 6 oil-contaminated soil and 30,000 tons of urban fill material was excavated and removed from the facility throughout the project's demolition phase. Activities included coordination with seven asphalt batching facilities, two landfills, and several transportation companies. Mr. Lindsay also assisted in the pre-characterization of excavated soil to determine proper off-site disposal alternatives. Continuous management of soil volumes and contractor invoices was necessary to expedite the soil removal process and reduce delays to the project.
- **Tidal Study, Former Mystic Station Power Generating Facility, Everett, Massachusetts.** Mr. Lindsay completed a study involving the effect of tidal fluctuation on groundwater elevation in the vicinity of a large soil excavation and two one-million-gallon bulk fuel oil tanks. The tidal data and its effect on groundwater elevation were used to assess the stability of the supporting matrix beneath the bulk oil tanks. The data assisted in the determination of the type of engineering needed to protect the structural integrity of the fuel oil tanks during planned soil excavation located adjacent to the tanks. By including the tidal fluctuation data, excavation in the immediate vicinity of the tanks was conducted without jeopardizing the tanks or causing delays to the project.

- **Multiphase Investigation, Stoughton, Massachusetts.** In order to bring the property into compliance with the MassDEP, Mr. Lindsay completed an MCP Phase I and Tier Classification to address eight areas of concern. Each area of concern was associated with a release of petroleum compounds and lead from the former use of the Site as an asphalt batching facility. Existing soil and groundwater analysis data, soil removal quantities, and previous RAM Plans completed by others were used to delineate the existing areas of contamination and propose remedial alternatives. The primary sources of subsurface impacts were attributed to asphalt fill material, liquid asphalt tanks, buried drums, and a dry well. The property was classified as a Tier II disposal site and response actions were completed under a new RAM Plan which included oxygenate injections, petroleum-contaminated soil removal, and natural attenuation monitoring. A partial RAO closure report was prepared for seven of the eight areas of concern and natural attenuation monitoring of one area is ongoing.
- **PCB Release Abatement, Former Edgar Station, Weymouth, Massachusetts.** Mr. Lindsay delineated the extent and distribution of high concentrations of PCBs impacted soil and groundwater beneath several former transformers at the facility. In accordance with US EPA TSCA regulations, activities included on-site, quantitative PCB field screening of soil, groundwater, and surface wipe samples, supervision of soil excavation, and management of soil transportation to select soil disposal facilities. Several thousand tons of PCB-impacted soil was removed, risk to on-site workers was eliminated, and future project demolition milestones were completed on schedule.
- **Multiphase Investigation and Remedial Operation Status, Sharon, Massachusetts.** Mr. Lindsay conducted a Phase I and a Phase II Comprehensive Site Assessment at a former manufacturing facility. Activities included the calculation of groundwater flow and determining the extent and distribution of chlorinated solvents in groundwater. Mr. Lindsay assisted in source area location, fate and transport – mass flux calculations, and risk assessment. As part of a Phase III study, remedial alternatives were proposed to comply with stringent drinking water standards applicable to the property. Because natural attenuation and monitoring were determined to be the most cost-effective alternatives, a Phase IV Remedy Implementation Plan and Phase V Remedial Operation Status were prepared and submitted to the MassDEP. Semi-annual groundwater monitoring and status reports are generated for client and MassDEP review.
- **Multiphase Investigation, Stoughton, Massachusetts.** Mr. Lindsay completed a Phase I Site Assessment at a former trucking facility. Activities included the review of prior U.S. Environmental Protection Agency (U.S. EPA) CERCLA investigations, identification of an underground storage tank, and completion of a Tier Classification for the property. A Phase II Comprehensive Site Assessment completed by Mr. Lindsay included the installation of several soil borings and monitoring wells and removal of an underground storage tank and impacted soil in order to delineate subsurface impacts. A Method 3 risk characterization was completed utilizing all existing site data and an RAO closure report was completed.
- **RAOs and Activity and Use Limitations (AULs), Cambridge, Massachusetts.** Several subsurface investigations designed to delineate the extent of urban fill material were supervised by Mr. Lindsay on six parcels of industrial land in Cambridge. At each parcel, site-specific risk characterizations followed by the preparation of separate Activity and Use Limitations restrictive of current and future site uses were completed in order to effectively ‘close’ the parcels under the MCP.

- **Phase I and Phase II Environmental Investigations, Mesa, Arizona.** Mr. Lindsay completed Phase I and Phase II environmental investigations at a dry cleaning facility and oversaw several Geoprobe borings. Based on soil sampling results, a risk characterization was conducted in order to bring the property into compliance with State of Arizona regulations.
- **Corrective Action Plan and Underground Storage Tank Removal, Alexandria, Virginia.** Mr. Lindsay monitored and maintained a groundwater petroleum extraction system for two years at an active trucking facility. After supervising the dismantling of the groundwater extraction system, over 900 tons of petroleum-contaminated soil was removed and the property was closed in accordance with Virginia regulations.
